Protekote UP 2120 Chrome Effect Coating

Protekote UP 2120 is a high-performance chrome effect coating specifically formulated to provide exceptional corrosion resistance for a wide range of surfaces. This advanced coating is designed to mimic the appearance of chrome while offering superior protection against corrosion, making it ideal for applications where both aesthetic appeal and durability are paramount.

Chrome Effect: Protekote UP 2120 delivers a brilliant chrome-like finish, enhancing the visual appeal of coated surfaces and providing a sleek, metallic appearance.

Corrosion Resistance: This coating offers outstanding resistance to corrosion, protecting surfaces from the detrimental effects of moisture, chemicals, and environmental factors.

Durable Protection: With its robust formulation, Protekote UP 2120 provides long-lasting protection against corrosion, ensuring the longevity and integrity of coated surfaces even in demanding conditions.

Versatile Application: Suitable for a variety of substrates, including metal, plastic, and composite materials, Protekote UP 2120 can be applied across diverse industries such as automotive, aerospace, marine, and architectural.

Easy Application: Designed for ease of application, Protekote UP 2120 can be applied using conventional spray equipment, allowing for efficient coating processes and consistent results.

Protekote UP 2120 Chrome Effect Coating offers a winning combination of aesthetic appeal and superior corrosion protection, making it the ideal choice for demanding applications where quality and performance are paramount.

The statements, technical information and recommendations contained herein are believed to be accurate as of the date hereof. Since the conditions and methods of use of the product and of the information referred to herein are beyond our control, NextMaterial expressly disclaims any and all liability as to any results obtained or arising from any use of the product or reliance on such information; NO WARRANTY OF FITNESS FOR ANY PARTICULAR PURPOSE, WARRANTY OF MERCHANTABILITY OR ANY OTHER WARRANTY, EXPRESSED OR IMPLIED, IS MADE CONCERNING THE GOODS DESCRIBED OR THE INFORMATION PROVIDED HEREIN. The information provided herein relates only to the specific product designated and may not be applicable when such product is used in combination with other materials or in any process. The user should thoroughly test any application before commercialization. Nothing contained herein constitutes a license to practice under any patent and it should not be construed as an inducement to infringe any patent and the user is advised to take appropriate steps to be sure that any proposed use of the product will not result in patent infringement. See SDS for Health & Safety Considerations. NextMaterial has implemented a Medical Policy regarding the use of NextMaterial products in medical device applications that are in contact with the body or circulating bodily fluids (<http://www.NextMaterial.com/en/social-responsibility/responsible-product-management/medical-device-policy/index.html>) NextMaterial has designated medical grades to be used for such medical device applications. Products that have not been designated as medical grades are not authorized by NextMaterial for use in medical device applications that are in contact with the body or circulating bodily fluids. In addition, NextMaterial strictly prohibits the use of any NextMaterial products in medical device applications that are implanted in the body or in contact with bodily fluids or tissues for greater than 30 days. The NextMaterial trademarks and the NextMaterial name shall not be used in conjunction with customers' medical devices, including without limitation, permanent or temporary implantable devices, and customers shall not represent to anyone else, that NextMaterial allows, endorses or permits the use of NextMaterial products in such medical devices. It is the sole responsibility of the manufacturer of the medical device to determine the suitability (including biocompatibility) of all raw materials, products and components, including any medical grade NextMaterial products, in order to ensure that the final end-use product is safe for its end use; performs or functions as intended; and complies with all applicable legal and regulatory requirements (FDA or other national drug agencies). It is the sole responsibility of the manufacturer of the medical device to conduct all necessary tests and inspections and to evaluate the medical device under actual end-use requirements and to adequately advise and warn purchasers, users, and/or learned intermediaries (such as physicians) of pertinent risks and fulfill any post market surveillance obligations. Any decision regarding the appropriateness of a particular NextMaterial material in a particular medical device should be based on the judgment of the manufacturer, seller, the competent authority, and the treating physician.
