ProtekoteAdr404: Graphene Abrasion and Dirt Resistant Coating

ProtekoteAdr404 sets the new standard in protective coatings with its advanced graphene technology. Engineered to resist abrasion and repel dirt, ProtekoteAdr404 ensures your surfaces stay cleaner and last longer in even the harshest environments.

Key Features:

Abrasion Resistance: Say goodbye to surface damage caused by friction and wear. ProtekoteAdr404 forms a durable barrier that shields your surfaces from scratches and abrasions, preserving their pristine appearance.

Dirt Repellent: Keep surfaces looking cleaner for longer. ProtekoteAdr404's innovative formula repels dirt and grime, making cleanup effortless and reducing maintenance costs.

Long-lasting Protection: With ProtekoteAdr404, you can trust that your surfaces are safeguarded for the long haul. Its robust formulation ensures enduring protection against the elements, extending the lifespan of your assets.

Versatile Application: Whether you need protection for industrial equipment, automotive surfaces, or household appliances, ProtekoteAdr404 delivers reliable performance across a wide range of applications.

Enhanced Durability: Protect your investments with confidence. ProtekoteAdr404 offers superior durability, even in high-traffic areas or harsh conditions.

Maintenance Savings: Reduce the time and resources spent on cleaning and maintenance. ProtekoteAdr404's dirt-repellent properties make upkeep a breeze, saving you valuable time and money.

Environmental Benefits: Minimize environmental impact with ProtekoteAdr404's eco-friendly formulation. By extending the lifespan of your surfaces, you reduce the need for frequent replacements, contributing to a more sustainable future.

The statements, technical information and recommendations contained herein are believed to be accurate as of the date hereof. Since the conditions and methods of use of the product and of the information referred to herein are beyond our control, NextMaterial expressly disclaims any and all liability as to any results obtained or arising from any use of the product or reliance on such information; NO WARRANTY OF FITNESS FOR ANY PARTICULAR PURPOSE, WARRANTY OF MERCHANTABILITY OR ANY OTHER WARRANTY, EXPRESSED OR IMPLIED, IS MADE CONCERNING THE GOODS DESCRIBED OR THE INFORMATION PROVIDED HEREIN. The information provided herein relates only to the specific product designated and may not be applicable when such product is used in combination with other materials or in any process. The user should thoroughly test any application before commercialization. Nothing contained herein constitutes a license to practice under any patent and it should not be construed as an inducement to infringe any patent and the user is advised to take appropriate steps to be sure that any proposed use of the product will not result in patent infringement. See SDS for Health & Safety Considerations. NextMaterial has implemented a Medical Policy regarding the use of NextMaterial products in medical device applications that are in contact with the body or circulating bodily fluids (<http://www.NextMaterial.com/en/social-responsibility/responsible-product-management/medical-device-policy/index.html>) NextMaterial has designated medical grades to be used for such medical device applications. Products that have not been designated as medical grades are not authorized by NextMaterial for use in medical device applications that are in contact with the body or circulating bodily fluids. In addition, NextMaterial strictly prohibits the use of any NextMaterial products in medical device applications that are implanted in the body or in contact with bodily fluids or tissues for greater than 30 days. The NextMaterial trademarks and the NextMaterial name shall not be used in conjunction with customers' medical devices, including without limitation, permanent or temporary implantable devices, and customers shall not represent to anyone else, that NextMaterial allows, endorses or permits the use of NextMaterial products in such medical devices. It is the sole responsibility of the manufacturer of the medical device to determine the suitability (including biocompatibility) of all raw materials, products and components, including any medical grade NextMaterial products, in order to ensure that the final end-use product is safe for its end use; performs or functions as intended; and complies with all applicable legal and regulatory requirements (FDA or other national drug agencies). It is the sole responsibility of the manufacturer of the medical device to conduct all necessary tests and inspections and to evaluate the medical device under actual end-use requirements and to adequately advise and warn purchasers, users, and/or learned intermediaries (such as physicians) of pertinent risks and fulfill any post market surveillance obligations. Any decision regarding the appropriateness of a particular NextMaterial material in a particular medical device should be based on the judgment of the manufacturer, seller, the competent authority, and the treating physician.
